

**FOOD TO GO
PACKAGING**

INNOVATIVE FOOD TO GO PACKAGING

Today's consumers are discerning and demand easy to use products that are appealing, functional and environmentally responsible. Anson offers you more than packaging. We believe that quality and environmental care go hand in hand with competitive prices and on-time delivery.

To us, great design is not just about the tangible format of the packaging; it is creating packaging that intelligently minimises environmental impact. We supply packaging solutions to the food to go industry and the retail sector throughout Europe and we work in a dedicated fashion to optimise design, production and delivery.

Environmental commitment

As a leading producer in the use of recycled plastic (rPET),

Anson helps raise awareness of the waste challenges faced by the industry. The use of recycled plastic (rPET) for our Food to Go range significantly contributes to minimising society's carbon footprint.

Design with appetite appeal

Our skilled in-house design team has developed an extensive range of innovative Food to Go products that focus on convenience, quality and environmental impact. This enables our customers to communicate product and brand values through great on-shelf presence.

As your packaging partner, we look forward to a productive and mutually beneficial collaboration.

DESIGN, INNOVATION, QUALITY

Are you looking for innovative packaging that is easily recognisable and intrigues new customers? The high-quality Anson Food to Go range is based on current lifestyle trends and offers great on-shelf appeal. Thanks to extensive knowledge, experience and advanced technology, we offer you efficiency in the design process, high-quality products and on-time delivery.
